Professional Summary

Software Engineering student with hands-on experience developing full-stack web, mobile, and IoT applications using React, Node.js, Express, Spring Boot, PHP, Firebase, and MySQL. Passionate about web development, system design, and building scalable, user-focused software solutions. Strong foundation in REST APIs, authentication, database design, and collaborative software development, with multiple academic projects demonstrating practical problem-solving and software engineering skills.

Education

Higher National Diploma (HND) in Software Engineering
National Institute of Business Management (NIBM), Sri Lanka
2025 – Present

Diploma in Software Engineering
National Institute of Business Management (NIBM), Sri Lanka
2024 – 2025

Projects

- **Avenro Journey - Online Travel Agency & Booking Platform (React, Node.js, Express, MySQL)**
Developed a client-focused travel booking platform for a Sri Lankan tourism service provider, connecting tourists with trusted local drivers and travel services.
- **Pet Shop Management System (Spring Boot, React, MySQL)**
Developed a secure full-stack pet shop management system with authentication and appointment scheduling features.
- **Heart Disease Prediction System (Python, Scikit-learn, Machine Learning)**
Built a machine learning system for heart disease prediction using clinical data and predictive models.
- **Tourism Analytics Dashboard (Power BI, MySQL, ETL)**
Designed an interactive dashboard for tourism booking analysis, revenue trends, and destination performance insights.

- **AI-Integrated Web-Based Restaurant Management System (PHP, HTML, CSS, JavaScript, Firebase)**
Built a web-based restaurant management system with a PHP admin dashboard, Firebase Firestore integration, real-time menu management, order processing, and reporting features.
- **Restaurant Management & Food Ordering Mobile App (Flutter, Firebase)**
Developed a cross-platform food ordering application with real-time order tracking, an admin dashboard, and a delivery management module.
- **Smart Campus Queue Management System (Java, Data Structures & Algorithms)**
Developed a digital queue management system with priority-based token handling, waiting-time prediction, and queue optimization using queues, heaps, and other data structures.
- **Smart Hospital Medicine Cart System (ESP32, React, Firebase, IoT)**
Developed an IoT-based smart medicine cart with ESP32, RFID, and Firebase, featuring real-time patient monitoring, medicine verification, and a React-based web dashboard.

Academic & Freelance Project Experience

- Developed 8+ software projects across web, mobile, desktop, machine learning, and IoT domains.
- Built RESTful APIs, authentication systems, CRUD modules, and responsive user interfaces.
- Collaborated on software projects using Git, agile practices, JUnit, and Postman.
- Worked on client-focused web development projects involving tourism services and business management solutions.

Certifications & Other Qualifications

- Completed English Language Course at the Open University of Sri Lanka.
- Completed Certificate in Software Engineering at NIBM, Sri Lanka.
- Completed International Faculty of Mathematics & Physics Course at SNIT Campus.
- Currently learning Node.js, Express.js, NestJS, Next.js, AWS Cloud Basics, and Docker.

Skills

- **Programming Languages:** Java, JavaScript, PHP, Python, C#
- **Frameworks & Technologies:** React, Node.js, Express.js, Spring Boot, Flutter, Firebase, MySQL, SQL Server, Power BI
- **Core Knowledge:** Object-Oriented Programming (OOP), REST APIs, Authentication, CRUD Operations, Database Design, System Analysis, ETL, Data Visualization, Software Testing
- **Tools:** Git, GitHub, Postman, JUnit, MySQL Workbench, VS Code
- **Languages:** English (Intermediate Proficiency), Sinhala (Native Proficiency)
- **Soft Skills:** Problem Solving, Teamwork, Communication, Time Management
