PROFESSIONAL SUMMARY

Motivated and passionate Software Engineering student with strong interest in web development and system design. Experienced in developing web-based management systems using modern technologies such as PHP, Java, JavaScript, and Firebase. Demonstrates strong problem-solving ability, teamwork, and attention to detail through academic and practical projects.

Aspiring to become a skilled Software Engineer and professional Web Developer, with the goal of building efficient, scalable, and user-friendly software solutions that create real-world impact.

EDUCATION

Higher National Diploma (HND) in Software Engineering
National Institute of Business Management (NIBM), Sri Lanka
2025 – Present

Diploma in Software Engineering
National Institute of Business Management (NIBM), Sri Lanka
2024 – 2025

PROJECTS

- **Assistive Service Robot for Elderly Care (ESP32, Arduino IDE, IoT)**
Developed an ESP32-based indoor assistive robot with obstacle avoidance and Wi-Fi smartphone control, featuring a servo-operated robotic arm and real-time sensor-based navigation.
- **Restaurant Management & Food Ordering Mobile App (Flutter, Firebase)**
Developed a cross-platform food ordering system with real-time tracking, admin dashboard, and delivery module.
- **AI-Integrated Web-Based Restaurant Management System**
Developed admin dashboard using PHP, HTML, CSS, JavaScript and Integrated Firebase Firestore database and Implemented real-time menu management and reporting
- **Vehicle Service Management System (C# Desktop App) (C#, .NET, SQL Server)**
Created a Windows Forms application with secure login, billing automation, and report generation.
- **Vehicle Service Management System (Java, OOP)**
Built a console-based system applying OOP principles with service selection and cost calculation.
- **Pet Shop Management System (Spring Boot, React, MySQL)**
Developed a full-stack pet shop management system with RESTful APIs, appointment scheduling with business rule validation, and secure user authentication, including unit, integration, and API testing using JUnit and Postman.
(Developed as part of a team project)

SKILLS

- TECHNICAL SKILLS :
Java | PHP | C | JavaScript | HTML | CSS | MySQL | Firebase | Git | Spring Boot | React | Flutter | SQL Server
- Core Knowledge :
OOP | REST APIs | System Analysis | Authentication | Database Design | Software Testing
- Languages : English (Intermediate Proficiency), Sinhala (Native Proficiency)
- Soft Skills : Problem Solving, Teamwork, Communication, Time Management

ACADEMIC & PROJECT EXPERIENCE

(2024 - 2026 EXPECTED)

- Completed multiple software engineering projects during Higher National Diploma, developing web, mobile, desktop, and embedded systems applications.
- Gained hands-on experience in full-stack development using Spring Boot, React, Flutter, PHP, and MySQL.
- Built IoT-based robotics solutions using ESP32 and Arduino IDE.
- Implemented RESTful APIs, authentication systems, business logic validation, and software testing using JUnit and Postman.

OTHER QUALIFICATIONS

- Completed English Language Course at Open University of Sri Lanka
- Self-learning in modern web technologies
- Experience in developing real-world academic projects
